

Live Website Project Guide

Web Development & AI Automation Interns | TalentGro Global | 2026

You have been assigned a real website project. Your team of three will plan, design, build and submit a complete website for review by TalentGro.

What This Document Covers

- Your assigned website project and what it must do
- Exactly what you need to submit to complete the internship project
- The workflow your team must follow — step by step
- Quality rules every website must meet
- Frequently asked questions

Check the Excel file you received with this PDF. It shows your group number and the website domain assigned to your team of three. Look at the Projects section on Page 3 for the full description of your project.

Submission Deadline

Submission Deadline	21 July 2026
---------------------	--------------

Recommended Tools & Technology

Build Platform	Antigravity or Lovable or Codex
Tech Stack	Next.js + Supabase
Hosting	Vercel (recommended) or Netlify

Do not use WordPress, Wix, Webflow or any drag-and-drop site builder. This is a technical project — use the recommended platforms above.

What You Must Submit

Every team must submit **four deliverables**. All four are required. Do not submit without completing each one.

1. Project Report (Word file)

Upload one project report in Microsoft Word format to the TalentGro portal. Your report must be **40 to 45 pages**. Include: executive summary, client requirement analysis, competitor review (5 websites), brand positioning, audience personas, sitemap, wireframes, design decisions, technology choices, testing results and final reflections. Use real content throughout — do not use placeholder or dummy text.

2. Website Link

Paste the live URL of your website in the submission field. Your website must be live and accessible on the internet on submission day. Use Vercel, Netlify or any free hosting platform. *The real domain (e.g. entropytostillness.com) will be connected by TalentGro only after your website is reviewed and approved — not at the time of submission.*

3. Client Requirement Questionnaire

Complete the domain-specific client requirement questionnaire for your assigned project. All three team members must contribute to answering it. Include the completed questionnaire inside your Word report as a dedicated section. This questionnaire forms the foundation of your requirement analysis — do not skip it.

4. Screenshots inside Word file report

Include screenshots inside your Word document. Take screenshots of your website: homepage on desktop, homepage on mobile, inner pages, wireframes, the Vercel/Netlify dashboard showing it is live, and any other important views. Place them clearly inside the report with captions. Make sure the screenshots are clear, large enough to read, and labelled.

Important: Your Word report must be 40 to 45 pages. Use headings, sub-headings, tables and screenshots to fill the document properly. Do not submit a 5-page report and call it complete.

How to Submit on the Portal

1

Log into the TalentGro portal at **talentg.io**

2

Go to your internship dashboard → find the **Assignments** section

3

Open the **Live Website Project** assignment

4

Upload your **Word report file**

5

Paste your **live website URL** in the link field

6

Click **Submit** before 21 July 2026

Your Website Projects

There are **8 live website projects**. Each group of three builds one complete website from scratch. Check the Excel file to find which project has been assigned to your group.

Project 1

Entropy to Stillness

entropytostillness.com

A meditation and mindfulness platform helping users move from mental noise towards calmness and inner stillness. The website must feel peaceful, credible and responsible — never vague or medically misleading.

Project 2

TalentGro Quest

talentgroquest.com

A talent-discovery and STEM education platform for school students. It must inspire students, build confidence in parents, and give schools a clear partnership pathway.

Project 3

Teens Helpline

teenshelpline.org

A safe, age-appropriate emotional-support platform for teenagers. Safeguarding, privacy and crisis escalation are core requirements. Handle this topic with care and responsibility.

Project 4

TalentGro Sales School

talentgrosaleschool.com

A professional sales-learning platform developing industry-ready sales professionals through simulations, mentoring, live projects and career support.

Project 5

Emotional Ledger

emotionalledger.com

A premium author and thought-leadership website for the book Emotional Ledger. Build author credibility and convert visitors into readers and event participants.

Project 6

Indu Aggarwal

induaggarwal.com

An existing professional website to be audited and repositioned as an education leadership and institutional advisory platform.

Project 7

NirogiTanman

nirogitanman.com

An integrated preventive-wellness platform combining Ayurveda, naturopathy, yoga and meditation. No cure claims. Responsible, compliant wellness content only.

Project 8

Sanjay Aggarwal

sanjayaggarwal.co.in

An existing professional website to be audited and repositioned for a business coach, leadership mentor and AI growth strategist.

How Your Team Should Work

Follow this sequence carefully. **Do not skip any step.** Do not start designing the website before your requirement analysis is complete.

1 Understand your project. All three members read the project brief for your assigned domain.

2 Divide roles. One student leads research and content. One leads design and UI. One leads development and deployment.

3 Complete the questionnaire. Answer all client requirement questions for your domain. Write real, researched answers.

4 Prepare a requirement analysis. Summarise the website purpose, audience, pages and features needed.

5 Research 5 competitors. Find 5 similar websites. Note what works well and what you will improve.

6 Plan the sitemap. List all pages before you start building anything.

7 Create wireframes. Sketch or Figma the layout of each main page before development.

8 Build the website. Use Next.js + Supabase. Host on Vercel. Build on Antigravity, Lovable or Codex.

9 Test on mobile. Every page must work correctly on a phone screen.

10 Write the project report. 40–45 pages. Include everything: questionnaire, analysis, wireframes, screenshots, reflections.

11 Take screenshots. Capture your final website — desktop, mobile, inner pages, hosting dashboard.

12 Submit on the portal. Upload Word report + paste live URL before 21 July 2026.

Team Role Split

Student 1 — Research & Content	Student 2 — Design & UI	Student 3 — Development & Dep
Client questionnaire Research Competitor analysis Content writing SEO strategy Documentation	Wireframes Visual design Colour & typography Mobile layout Design system	Website development Next.js + Supabase setup Hosting on Vercel Performance testing Technical docs

Quality Rules

- Design for mobile first. Every page must work on a phone.
- Use real content — no Lorem Ipsum or dummy text anywhere.
- Use Next.js and Supabase as the technology stack.
- Build using Antigravity, Lovable or Codex — not WordPress, Wix or any no-code builder.
- Every page must load in under 3 seconds.
- All navigation links must work. No broken links.
- Include proper privacy policy and terms of use pages.
- Typography must be clean and consistent throughout the website.
- Do not copy layouts or content from other websites.
- Your report must be 40 to 45 pages with real content, not padded filler.

Frequently Asked Questions

Q: Can we use any coding platform?

A: Use Antigravity, Lovable or Codex to build. The tech stack must be Next.js + Supabase. Do not use WordPress, Wix, Webflow or similar drag-and-drop builders.

Q: Will TalentGro connect the real domain to our website?

A: Yes — but only after your website passes the TalentGro team's review. You submit your Vercel/Netlify link first. If it meets the quality standard, the real domain (e.g. entropytostillness.com) will be pointed to your website.

Q: How many pages must the Word report have?

A: Your report must be 40 to 45 pages. Use proper sections, headings, screenshots and tables. A report shorter than 40 pages will not be accepted.

Q: Do all three group members need to contribute?

A: Yes. All three members must contribute meaningfully. The report must show who did what. Divide the three roles and work together.

Q: Can we use free images from the internet?

A: Use royalty-free images only — from Unsplash, Pexels or Pixabay. Do not use copyrighted photos. Note image sources in your report.

Q: What if our project is an existing website (audit + reposition)?

A: For projects like Indu Aggarwal and Sanjay Aggarwal, you must first audit the existing website. Use the audit framework questions in your questionnaire section. Then redesign and rebuild the website based on your analysis.

Q: What happens after 21 July 2026?

A: The TalentGro team will review all submissions. Approved websites may go live on the real domain. All students who complete the project correctly will receive their internship completion certificate.
